

Optimum accuracy and consistency

DIE-CUTTING | CORRUGATED BOARD

EXPERTCUT 1.7 | 2.1

At a glance

Powering performance

Accuracy and consistency in die-cutting are vitally important if you want to gain, and maintain, customers. **EXPERTCUT 1.7 | 2.1** offers our legendary BOBST flatbed die-cutting precision, along with great versatility, excellent reliability and superb productivity. EXPERTCUT also features a highly productive workflow which means that job changeovers take less than eight minutes – so as well as delivering the speed you need on long runs you get the quick changeover you need on short runs. Two special packs available with **EXPERTCUT 1.7 | 2.1** further improve its already impressive performance, depending on your priorities.

Good protection and safety

Protecting the goods is the main requirement for corrugated boxes meaning high quality, clever designs, robustness and zero-fault.

Customized, premium, secured

Boxes play a new role where customization, high-graphics and security features are required.

Out of the box experience

Consumers expect the most relevant un-boxing of any goods. Packages are becoming more clever, telling a story as part of the brand positioning.

E-commerce

The demand is growing and is here to stay. Boxes need to come in almost any size and shape, requiring flexibility and productivity across the supply chain.

Sustainability

Packaging production needs to reduce its environmental carbon footprint – less waste across the entire supply chain. New and thinner substrates. Recycling and re-use are the new rules.

Perfect sheet feeding

Bottom feeder

- Rear sheet support with lateral and rear jogging for perfect sheet alignment
- Lateral joggers with blower for perfect sheet insertion even with microflutes
- Low drop, preventing possible sheet damage
- Vacuum suction plate handles all types of materials from microflute, litho-laminates to double-wall

Precise die-cutting

Platen section

- Completely new design and minimal deformation
- Reductions in makeready time and set-up time as well as cutting force needed
- Substantially increased machine up-time and tool life
- Paired with a chase loader, productivity is further increased because the next job is prepared off-press and changeover is fast and easy

Optimum transport

Double cam gripper bar advance

- Accelerates and decelerates sheets in the smoothest way possible
- The new lower gripper position further enhances flat sheet travel, reducing stress on the sheet as it travels through the machine and allowing for higher production speeds
- Smaller contact points for improved finished product quality

High efficiency

HMI SPHERE

- SPHERE provides a single point of control for all functions of the machine
- Intuitive and operator-friendly navigation with step-by-step setup
- Possibility to recall of up to 5,000 job settings
- Allows swift setups and changeovers for more machine uptime
- SPHERE allows machines and data to be connected in one comprehensive platform

Non-stop productivity

Delivery

- Uninterrupted production while evacuating die-cut batches
- Electronically controlled braking brush for optimal sheet slow-down and stability
- Especially useful for trailer-mounted jobs
- Male-female ejection tool for accurate removal of front waste, even at full speed

Precise register

ACCUREGISTER

- Optional “No sheet-edge contact” system guaranteeing perfect register quality
- Large correction range in front and lateral direction
- Higher machine performance by reducing feed related production stops
- Less waste during set up and production

Related products

MASTERFLEX-HD

Your EXPERTCUT is the perfect partner to a MASTERFLEX-HD press, letting you produce complex boxes, featuring high definition print, in just one pass.

BREAKER 2 FLAT TRACK

Handling smallest batches - 150 x 150 mm (5.91 x 5.91 in) - at a rate of 300 per hour, BREAKER 2 FLAT TRACK is your full solution for mastering your layer arrangement solution.

LOADER AF

Our top feeder solutions handle piles up to 2,000 mm (78.75 in) high, sheets up to maximum size and materials from the lightest to the heaviest - while also ensuring a consistent board stream and no operator intervention.

ROBOLOADER

With ROBOLOADER, the transfer of blank piles to the feeder area is completely automated. The robot ensures regular and consistent feeding at top machine speeds, enabling optimal production line productivity.

ROBOPALLETIZER FG

ROBOPALLETIZER allows to stack blank piles or box batches in various patterns, completely automating the palletizing process at the end of the converting line.

Digital age manufacturing happening with BOBST Connect

BOBST Connect is an end-to-end, user-centric digital platform that enhances and increases your packaging productivity. It's designed to help you make the most of the data your machine generates, improving efficiency across your value chain.

As well as exceptional data insights, BOBST Connect helps to orchestrate and improve your whole production process, from your PDF to the finished product and quality report. It brings data and digital services together in one fully connected platform, with machine insights and expertise built in.

All of this is available to you as part of BOBST Connect Essential, the first subscription level that you receive when you purchase a new BOBST machine.

Performance analysis

- Production insights, including interaction of OEE components
- Identify and eliminate performance gaps

Accurate reporting

- Meaningful insights on OEE and downtime
- Accurately measure target speed and quality losses
- Trend analysis over time

Progress indicator

- Highlights extensive production deviations
- Empowers timely interventions

Remote assistance

- Priority access to technical specialists
- Video with Augmented Reality expert support based on real-time data
- Available 24/7 (optional)

Shift management

- Optimize planning time
- Deliver overall resource efficiency

Full tooling process optimization

In this challenging market, great tooling provides the consistency that you and your customer need, from the first to the last box of an order. BOBST offers the most advanced tools and equipment for die-making and converting processes so you can exceed customer quality and turnaround expectations, all while maximizing uptime and profitability.

For more information on advanced tooling and die-making products, please contact our experts.

[> LEARN MORE](#)

World-class die-cutting

- Forward thinking die-making equipment and software
- Shorter lead times without compromising quality
- Create exceptionally precise tooling for every converting process

Certified Die-Makers

The Certified Die-Makers Program supports and promotes world-class local die-makers. Choosing a certified die-maker guarantees the best local tooling solutions, with BOBST supporting the ongoing innovation, digitalization and quality improvements of these specialists.

Enhanced converting

- Industry-leading range of equipment
- Made for all cutting, stripping and blanking stations
- Shortens set-up and changeover times

Digital technology for smarter converting

TooLink brings converting into the digital world. It is the new platform that connects your machines and tooling, and brings together your entire converting process to transform production flexibility, job turnaround times, and overall productivity.

A BOBST die-cutter can be data-chipped with TooLink, creating a unique digital ID that enables instant recognition through your machine HMI, and provides a production-ready job recipe. TooLink helps to simplify and automate the production process, putting you ahead of the curve for smart and more sustainable converting.

Extensive benefits

- Saving up to 15 minutes in job changeover times, increasing efficiency and flexibility
- More consistency and continuity in the job recipe management for better product quality
- Fewer setup adjustments for increased cost-efficiency and sustainability

Technology for the future

- Industry-leading digital technology
- 2 sets of $\geq$ High Performance Tooling - including TooLink chips - for machines with blanking
- Ready for BOBST Connect platform, allowing an end-to-end process overview, for complete production process management and optimization

Rapid digital

Streamline the comparison and proofing of sample prints and die-cut blanks using the innovative, new BOBST Digital Inspection Table. Projecting HD original artwork images onto samples, it allows for instant and paperless assessment, digitally and in real time – eliminating the need for overlays and print minis.

Extensive benefits

Productivity

- Fast setup, simple touchscreen UI
- High-quality proofing reduces errors
- Eliminate Library of Tracing to lower costs and save space

Quality

- Rapid, accurate quality control
- Automated quality tracking
- Performance measurement and issue identification

Cutting-edge features

- HD projectors for accurate illumination
- Real-time imaging
- Automated data capture, records and receipts
- Full or partial warp analysis, pre or post-conversion
