BOBST

BOBST Training academy
Focused on your efficiency

If your machines are underutilized or running below their capabilities, it means you are not getting the maximum value from them.

In today's global market, competitiveness, optimum quality and complete adaptability are constant requirements.

BOBST expert training

At BOBST, we're not only committed to providing the most efficient and innovative machines available.

We're also committed to helping you achieve the maximum possible benefit from them.

Let BOBST maximize your equipment's productivity thanks to our expertise. As you develop your **knowledge, skills** and **experience,** you'll have a better understanding of your equipment and be able to use it to its full potential.

Your competitiveness is driven by your employees

Our training programs provide courses from beginner to experienced level, and for different roles:

- Machine operators
- Maintenance operators
- Machine managers
- Process engineers

A range of different courses
A constantly growing training offering

BOBST offers a variety of **basic** and **advanced training courses** for all equipment. All our training courses are focused on achieving and maintaining your equipment productivity at its peak. They combine **theoretical and on-the-job training.**

Tailor-made traning courses

Our tailor-made courses are ideal when you need a course designed to meet your specific training requirements.
We take the time to understand the improvements your business would like to see, so that our course works for you.

BOBST Training academy
Benefits for you and your business

Investing in people has a far-reaching impact

- Better trained and **more motivated** personnel
- Better **knowledge** allows for equipment to perform at its peak
- **Fewer errors**
- Faster **problem elimination**
- **Increased productivity**
- Machine **failure prevention**
- **Downtime reduction**
- Process technology **skills**

  - Basic operator training program (short)
  - Basic operator training program (long)
  - Mechanical maintenance
  - Electrical maintenance
  - Litho-Lamination process (short)
  - Litho-Lamination process (long)

Basic operator training program (short)

Maximum participation: 5 persons

Litho-lamination is a complex process that directly impacts the quality of your production. This training course equips operators with **essential knowledge** to master this process and perform basic maintenance on Litho-laminating machines.

ORGANISATION		COURSE CONTENT
Prerequisites	• None	• Use of documentation • Safety and environment • Machine controls and operation • Production process
Duration	• 10 days (80 hours)	
Place	• At customer site • In classroom and on the machine	
Included services	• Documentation • Hours of training • Hotel • Daily expenses	
Excluded	• Hours and travel expenses • Local transport	

AVAILABLE FOR MACHINES
- FLUTE & STAR series

LANGUAGES
- English
- German
- Other language required (interpreter cost not included)

SUITABLE FOR
- Machine Operators
- Machine Managers
- Process Engineers

Mechanical maintenance

Maximum participation: 5 persons

Regular, accurate and professional maintenance is vital for your machine to work reliably and profitably for many years. Our mechanical maintenance course qualifies your specialists to keep your machine in perfect condition throughout its entire lifecycle, increasing **machine availability, enhancing production quality and extending your equipment's lifespan.**

ORGANISATION

Prerequisites	• None
Duration	• 4 days (32 hours)
Place	• At customer site • In classroom and on the machine
Included services	• Documentation • Hours of training • Hotel • Daily expenses
Excluded	• Hours and travel expenses • Local transport

COURSE CONTENT

- Safety and environment
- Machine controls / HMI
- General Maintenance
- Periodic and non-periodic maintenance
- Lubricants

AVAILABLE FOR MACHINES

– FLUTE & STAR series

Electrical maintenance

Maximum participation: 5 persons

Regular, accurate and professional maintenance is vital for your machine to work reliably and profitably for many years. Our electrical maintenance course qualifies your specialists to keep your machine in perfect condition throughout its entire lifecycle, increasing **machine availability, enhancing production quality and extending your equipment's lifespan.**

ORGANISATION

Prerequisites	• Authorization to work on electrical installations
Duration	• 4 days (32 hours)
Place	• At customer site • In classroom and on the machine
Included services	• Documentation • Hours of training • Hotel • Daily expenses
Excluded	• Hours and travel expenses • Local transport

COURSE CONTENT

- Safety and environment
- Machine controls / HMI
- Machine operation
- Reading diagrams and locating components
- Practical exercises

Litho-lamination process (short)

Maximum participation: 5 persons

To maximize the efficiency of your production equipment, it's crucial for your staff to reach their full potential. Conducted by one of our process specialists, this training **equips operators with the skills and knowledge needed to optimize output.**

ORGANISATION	
Prerequisites	• None
Duration	• 5 days (40 hours)
Place	• At customer site • In classroom and on the machine
Included services	• Documentation • Hours of training • Hotel • Daily expenses
Excluded	• Hours and travel expenses • Local transport

COURSE CONTENT

- Review of the various difficulties encountered
- Optimization of the "person-machine-process interaction"
- Process troubleshooting
- Analysis of possible recurring problems
