# Powering performance

Batching with the semi-automatic **STREAMPACK** increases net output by gathering boxes, then readying them to be strapped and palletized. It can be used with most standard strapping units. It is the rational solution that brings together all types of corrugated and heavy solid board boxes. Batch transfer is carried out in-line. So simple to use, it can be run regardless of order length.

# Creating value

**BOBST innovations**  
are driven by customer  
and brand owner needs.

> READ MORE

## Good protection and safety

Protecting the goods is the main requirement for corrugated boxes meaning high quality, clever designs, robustness and zero-fault.

## Customized, premium, secured

Boxes play a new role where customization, high-graphics and security features are required.

## Out of the box experience

Consumers expect the most relevant un-boxing of any goods. Packages are becoming more clever, telling a story as part of the brand positioning.

## E-commerce

The demand is growing and is here to stay. Boxes need to come in almost any size and shape, requiring flexibility and productivity across the supply chain.

## Sustainability

Packaging production needs to reduce its environmental carbon footprint – less waste across the entire supply chain. New and thinner substrates. Recycling and re-use are the new rules.

Increase net output

### High productivity

- Assembles reverted or non-reverted bundles of boxes
- Being wheel-mounted, it can be adapted quickly and easily to any folder-gluer
- Its operating simplicity allows it to be run regardless of order length
- Reduces the workload and increases productivity

Increase uptime

### Flexibility

- Adaptable to most folder-gluer
- For corrugated or heavy solid board boxes
- Processes straight line, crash-lock bottom and 4 & 6-corner boxes

Simple to use

### Easy handling

- Only one operator is needed to form bundles of counted boxes
- Bundles are automatically conveyed into the strapping machine or towards any other packaging solution
- Helps end-of-line staff to keep up with their folder-gluer, reducing workload

# Maintaining excellence

Expert services for all your equipment.  
Improve your processes, boost your productivity and enhance your expertise with a complete range of services from BOBST.

## Maintenance Plus

- Scheduled maintenance with BOBST certified technicians
- Preventative intervention, maximizing machine uptime
- Optimum performance over the equipment lifetime

[> WATCH VIDEO](#)

## Approved parts and logistics

- BOBST Original and Certified parts, and consumables
- Quality assurance, and extended maintenance intervals
- Worldwide distribution, and full availability where and when you need it

[> LEARN MORE](#)

## Machine upgrades

- Additional features, configured for your machine
- Enhanced functionality, connectivity and capability
- Future-proofing your investment, maintaining competitive advantage

# Digital age manufacturing happening with BOBST Connect

BOBST Connect is an end-to-end, user-centric digital platform that enhances and increases your packaging productivity. It's designed to help you make the most of the data your machine generates, improving efficiency across your value chain.

As well as exceptional data insights, BOBST Connect helps to orchestrate and improve your whole production process, from your PDF to the finished product and quality report. It brings data and digital services together in one fully connected platform, with machine insights and expertise built in.

All of this is available to you as part of BOBST Connect Essential, the first subscription level that you receive when you purchase a new BOBST machine.

## Performance analysis

- Production insights, including interaction of OEE components
- Identify and eliminate performance gaps

## Accurate reporting

- Meaningful insights on OEE and downtime
- Accurately measure target speed and quality losses
- Trend analysis over time

## Progress indicator

- Highlights extensive production deviations
- Empowers timely interventions

## Remote assistance

- Priority access to technical specialists
- Video with Augmented Reality expert support based on real-time data
- Available 24/7 (optional)

## Shift management

- Optimize planning time
- Deliver overall resource efficiency
